Garbage and waste disposal

The rules on garbage and waste disposal in Belgium has become very strict. Most communes have their own procedures and system and failing to follow these, can result in fines. Here some general rules to consider:

- ❖ In case of morning pick-ups, only put your garbage bag outside the previous day after 6 pm.
- ❖ Separate your waste carefully. You have glass containers for white and colored glass at different places. You have bleu bags for tin cans and plastic bottles. Also your paper you can separate in boxes.
- ❖ For more information in English go on www.fostplus.be
